Prepare to Play and Return to Play
Guidelines.

Workplace Guidelines

COVID-19 spreads through respiratory droplets produced when an infected person coughs or sneezes. A person can acquire the virus by touching a surface or object that has the virus on it and then touching their own mouth, nose or eyes.

A keyway you can protect workers and others from the risk of exposure to COVID-19 is by implementing appropriate cleaning and disinfecting measures for your workplace.

As required by government guidelines, all Centres must have a written plan for safe operation in place.
